Portfolio
skiran.vercel.app

TECHNICAL SKILLS

Languages
- Python 3
- JavaScript (ES6+)
- SQL
- HTML5 & CSS3

Backend
- Django & DRF
- ASGI / WSGI
- RESTful APIs
- Middleware

Frontend
- React & Vite
- Three.js
- Responsive Web
- Tailwind CSS

AI / ML
- Agentic AI Systems
- LLM Reasoning
- LangChain
- Prompt Eng.

Databases
- PostgreSQL
- SQLite
- Normalization
- Indexing

Tools
- Git & GitHub
- Docker (basics)
- Postman
- CI/CD Workflows

PROFESSIONAL SUMMARY

Python Django full stack developer specializing in high-concurrency backend architectures, RESTful APIs, and reactive user interfaces. Proven experience integrating agentic AI workflows and LLM reasoning into production-ready web platforms with robust PostgreSQL database design.

KEY ENGINEERING & AI PROJECTS

FinSight AI - Intelligent Personal Finance & Cash-Flow Platform
- Problem Solved: Eliminates personal liquidity risks and cash-flow volatility by identifying recurring spending
- Stack Architecture: Engineered high-throughput REST APIs using Python, Django REST Framework, and P
- AI/LLM Integration: Integrated LangChain and LLM reasoning pipelines to automatically parse banking state

PayMatch AI - Intelligent Payment Reconciliation System
- Problem Solved: Resolves multi-gateway payment mismatches, fee anomalies, and missing settlement reco
- Stack Architecture: Architected robust backend reconciliation workflows in Python and Django with strict AC
- AI/LLM Integration: Implemented fuzzy matching agents and LLM-driven discrepancy analyzers to classify a

FinSim - Personal Financial Stress Testing & Scenario Simulator
- Problem Solved: Enables users to evaluate financial resilience by simulating real-world shocks like inflation
- Stack Architecture: Developed deterministic financial simulation algorithms using Python and Django ORM,
- AI/LLM Integration: Integrated generative AI scenario modeling agents that evaluate multi-variable macroeco

EDUCATION & PROFESSIONAL IMMERSION

Python Django Full Stack Development (6-Month Program) Avodha | In progress (Month 5 of 6)
Coursework: Python 3, Django, DRF, Relational Databases, API Engineering, System Deployment

Bachelor of Science (B.Sc), Computer Science CMM College | Coursework Completed (2023 - 2026)
Coursework: Data Structures, OOP, Database Systems, Software Engineering, Operating Systems

Higher Secondary Education (HSS) - Science & Computer Applications Sahodaran Memorial HSS | Completed

Secondary School Leaving Certificate (SSLC) Rama Varma Union High School | Completed
